**PORTFOLIO** • (Can be shared in-person upon request *or* by visiting my website at [www.rremundo.com](http://www.rremundo.com))

### **education**

2001 - 2003	Glencoe High School, Hillsboro, OR
2003 - 2005	<i>High School Diploma</i> Liberty High School, Hillsboro, OR
2005 - 2009	<i>Bachelor's Degree in Journalism &amp; Mass Communication</i> St. Michael's College, Colchester, VT

During my time at St. Michael's, I was an active disc jockey and webmaster for the campus radio station. I also worked in close proximity with foreign students (as part of the Applied Linguistics Department's work-study) to help them get accustomed to living on a US college campus. I have also led them on off-campus excursions that allowed them to further interact with US students and improve their communication.

Over the four years of being a Purple Knight, I feel that three courses in my major, along with several art courses, have really prepared me for the real world. DigiFilm examines all different types of film and the ideas behind them. In that course we also had to create four different films, which utilized programs such as Adobe Premiere and Encore. The two other courses were New Media and New Media II. In New Media, I reinforced my knowledge of Adobe Dreamweaver and Photoshop, as well as FreeHand. In New Media II, I was able to master Adobe Flash, which I still use to this day at Eternity Web Development.

### **experience**

2008 - Present      Web Developer, Eternity Web Development

My time at Eternity Web Development began when I was an intern for them in the fall of 2008. During that semester I assigned to put content into the web sites, made sure links worked properly, build a few slideshows, and I was even able to design a website.

In the spring of 2009, I was offered a part-time job with the company where I kept putting content into the websites, however now I was able to implement my graphic design experience into my work. I was also able to further my experience with Adobe Flash while creating environments for animated squirrels for a client.

2005 - 2009 DJ, WWPV 88.7FM "The Mike"  
2007 - 2009 Webnician, WWPV 88.7FM "The Mike"

As webnician (webmaster) it was my responsibility to maintain the web site; to keep it running and up-to-date. I took it upon myself to redesign the page twice and both designs were well received in my surrounding community.

2008 Tech Editor, The Echo (Online Student Publication)

Before merging with the college's print newspaper, the Defender, the Echo focused more on stories relating to Vermont. While I was part of the Echo staff I was in charge of maintaining the web site as well as actively contributing to the magazine with articles and multimedia (which I can share in-person). I was also an editor of articles.
